Tuberculosis

World Tuberculosis Day

MARCH 24

A fun Questionnaire

This month, community members can participate by answering the questions in this flyer and receive a prize for participation and answering questions correctly. Please submit answers by Tuesday March 28th and let's learn about TB together!

Questions

1. What organ does Tuberculosis (TB) primarily effect?
2. How do we get tested to see if we have a diagnosis of TB?
3. What are three symptoms of TB?
4. If you have a diagnosis of TB you are always contagious (true or false)
5. Is TB a viral or bacterial infection?
6. How does TB spread from one person to another?

Please send your answers to the e-mail below and include your name, age and contact information so we can provide an age appropriate prize. All community members are welcome to participate! We look forward to reading your answers!
