

COVID-19 Vaccine

Protect your self and the ones you love by staying up to date with the Fall 2023 COVID-19 vaccine.

Serious COVID-19 infections can cause long term complications, hospital stays, and even death.

XBB. 1.5-containing COVID-19 mRNA vaccine is the new recommended vaccine safe for those 6 months and older to start or continue COVID-19 vaccination series.

**Do you feel unwell?
Fever? Cough?**
Stay home and help protect those around you!

Masking although now optional is still an easy and proven way to contain and prevent the spread of COVID-19

Signs and Symptoms:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
