

MOHAWKS OF THE BAY OF QUINTE

Notice of Project

York Road Rehabilitation Phase 3

The portion of York Road between Wyman Road and Highway 49, along with the Sucker Creek Bridge, has fallen into a state of disrepair over the past few years. Since DMAF Water Main Construction has been completed along this section, with each home being connected to clean drinking water, TMC has authorized the final section of the York Road rehabilitation. Construction of Phase 3 will be completed by The Fidelity Group Inc.. Work began November 8th and will continue through the Fall of 2023 to June 2024. Weather and other unexpected delays may extend the project completion date.

York Road Rehabilitation Phase 3 includes:

- Cross road culvert installations
- Sucker Creek Structural rehabilitation
- Road Widening
- Repaving

These upgrades will provide safer travel conditions on our roads and bridges for our community. We ask that drivers please obey all construction traffic laws, follow instructions from construction traffic flaggers and pay attention to all workers, equipment and residents to ensure everyone makes it home safely at the end of the work day. You are being encouraged to find an alternate route when possible to limit how often you are passing through this construction zone. Construction will be limited to normal working hours on weekdays only, to minimize disruptions to the community.
